CENTRALIZE YOUR PATIENT RECORD REQUEST INTAKE PROCESS

The record request intake process is one of the most challenging parts of a healthcare system's operation, especially if your healthcare system manages multiple request types across multiple locations. Traditional manual input can be time-consuming, labor-intensive, inconsistent, and—at worst—a compliance risk. Verisma's first-of-its-kind Inbox™ tool automates this process, consolidating requests from multiple sites, instantly sorting and logging each request by location with accuracy and efficiency.

AUTOMATION MEANS MORE ACCOUNTABILITY AND FEWER ERRORS

Verisma Inbox™ gives you the most accurate view of your record release environment in the industry. With innovative barcode and smart OCR technology, as well as the most detailed audit trail available, Inbox™ ensures real-time accountability for all new requests. This real-time insight means fewer processing errors and faster turn-around times.

100% VISIBILITY ACROSS YOUR ENTIRE REQUEST INTAKE PROCESS

Verisma Inbox™ instantly automates your intake process. You can process a variety of record request format types across your enterprise, sorting each by location and request type. This technology ensures the most accurate pending request status available.

ROI THAT PROMISES TO PROTECT

Built on more than 20 years of experience and the foundational principles of truth and accuracy, Verisma brings you a partnership you can trust with the compliance-driven technology you need. Our disclosure management system was built with an understanding of your needs, and every module and security tool was designed to help you feel compliance-confident. Our partnership is truly a promise to put patient protection first.
