

VERISMA REQUEST APP™

IMPROVING THE PATIENT EXPERIENCE

Demand for patient-safe solutions is growing, and we are creating state-of-the-art remote tools to help you meet this shift. Our easy-to-use, convenient solutions create a virtualized experience that allows your health system and your patients more freedom and flexibility than ever. Verisma Request App™ (VRA) can help you deliver exceptional care and service to your patients.

CONVENIENT ACCESS

With VRA patients can complete, sign, and submit their requests electronically from the comfort of their home (or anywhere else, for that matter) and at their convenience 24/7. Mirroring the functionality they experience in other areas of their lives — e.g., banking, shopping, travel — patients can access VRA through your public web site or through your patient portal process, provide relevant information and securely submit their electronic ROI request.

AUTOMATED MANAGEMENT AND PROCESSING

The request is automatically and immediately entered into the Verisma Release Manager™ (VRM) solution, eliminating manual data entry steps, where it is managed and processed in a timely and compliant manner.

ELECTRONIC FULFILLMENT

Patients are also able to receive and download their records via VRA or have their records uploaded and delivered through your patient portal solution, if they so choose.

AUTOMATED ACCESS TO COVID-19 RECORDS

Patients are being asked to provide evidence of their COVID-19 test results to their employers and schools. VRA provides patients with a remote and safe way to quickly order and access their test result records, minimizing onsite patient traffic and inbound phone inquiries while enabling an automated and safer process for health system staff.

ROI THAT PROMISES TO PROTECT

Built on more than 17 years of experience and the foundational principles of truth and accuracy, Verisma brings you a partnership you can trust with the compliance-driven technology you need. Our disclosure management system was built with an understanding of your needs, and every module and security tool was designed to help you feel compliance-confident.

Our partnership is truly a promise to put patient protection first.

VERISMA REQUEST APP™

OFFERS THE SAME CONVENIENCE FOR ATTORNEYS

Verisma now offers the same self-service capabilities that are currently available to patients and their families, along with an expanded online request management portal, to 3rd party attorney organizations. Verisma's expanded VRA platform and request management portal provides attorneys with a remote, self-managed approach to electronic record ordering, tracking, payment, and delivery. This change will enhance efficiency and compliance, result in a more satisfied requestor experience, and eliminate the stress on providers of a paper-driven manual request process.

Benefits of VRA Attorney include:

- Up to a 50% reduction in total request turn-around-times with elimination of a paper driven request mail process, a manual paper request intake and logging process, and a manual delivery of paper record copies.
- Up to a 30% reduction in labor, supplies and postage costs with less need of a manual paper request intake, manual paper record copy distribution, and manual call support process.
- Strengthened compliance through advanced e-request/e-delivery capabilities significantly reducing common manual paper request entry and paper record copy delivery errors.
- Improved requestor satisfaction with ability to self-manage the entire request experience online while receiving record copies faster than ever before.

Convenient access means satisfied patients and other third party-requesters. That's what VRA delivers to you.

"Patients are increasingly consumer-minded when it comes to health care. Organizations like mine are committed to delivering the best possible patient experience from admission to discharge and beyond. VRA helps us make the task of requesting records simpler and more convenient."

- Laurie Fiore, RHIA
