

HEALTH INFORMATION LIFECYCLE MANAGEMENT

Verisma delivers secure, intelligent solutions across the health information lifecycle—earning trust at every step.

Technology-enabled Release of Information

Automate the ROI process and provide compliance guidance from request intake to fulfillment with Verisma Release Manager®

- 100% QA review for HIPAA-covered requests
- Full performance visibility through analytics
- Deep-rooted expertise integrated with your team

Data Archiving

Achieves 100% data retention and instant access in a fraction of the time with our modern approach. No ETL, no delays, and no data loss.

Revenue Cycle Support

Protect reimbursement dollars with Verisma Claims Audit Manager™, an end-to-end solution that creates a single source of truth for audit management and maximizes revenue integrity.

Value-Based Care

- Enable destination care providers and health plans to access accurate, complete medical records quickly and efficiently
- Support uninterrupted care and healthier patient outcomes
- Power key initiatives such as HEDIS, MIPS, and risk adjustment
- Streamline operations with second-pass recovery, referral tracking, and dedicated provider engagement
- Reduce administrative burden and accelerate quality and coding workflows

Care Coordination Solutions

Referral Management

Streamline and track the referral process to reduce gaps and delays that put patient care at risk.

Prior Authorization

Leverage people-powered technology to manage every step of the PA process, including follow-ups.

Inbound Document Management

Accelerate indexing and filing of incoming documents into your EHR to deliver the reporting providers need.

Patient Forms Completion

Improve patient satisfaction with timely completion of disability, FMLA, and other forms.

EHR Conversions / Chart Abstraction

Support for migration projects from upfront planning through data structuring and audit validation.
