

LEGACY PLATFORMS DON'T JUST SLOW YOUR SYSTEMS DOWN
THEY SLOW YOUR PEOPLE DOWN.

Olah™ transforms the burden of legacy systems into future-ready, compliant, and cost-efficient healthcare data access. It's not just about archiving. It's about ensuring your data continues to earn trust, even after it's retired.

Legacy System Pain Points	The Olah™ Difference
Redundant Systems = Technical Debt	No ETL required. Olah reduces technical debt by bypassing manual data mapping with a modern lift-and-shift archive approach. We copy the full database—intact—and build searchable reports on top, reducing IT burdens and accelerating implementation.
Soaring Maintenance & Licensing Costs	Shut it down. Archive legacy systems in as little as 90 days—then turn them off to eliminate recurring costs and complexity.
Security Vulnerabilities	Mitigate risk. Archive outdated systems to reduce your organization's cyber exposure while maintaining healthcare-grade security and compliance.
Disjointed Access to Critical Data	One place. One search. Instantly access all legacy data across applications through a single, lightning-fast interface.
Cumbersome ROI	Streamlined fulfillment. When patient data lives across multiple legacy systems, Release of Information becomes slow, manual, and error-prone. Olah brings all historical records into one place—reducing system logins, minimizing search time, and accelerating fulfillment.
Inability to Manage Accounts Receivable	Enable financial closure. Olah can archive and make legacy financial data accessible—supporting continued A/R resolution without relying on outdated platforms.

Purpose-Built to Deliver Value

Olah doesn't just store your data—it transforms legacy records into searchable, actionable assets so you can:

Alleviate Risk • Reduce Cost • Improve Accessibility

VERISMA OLAH™ BY THE NUMBERS

20+
Years of Archiving

250+
Applications Archived, Including
Top Systems Like **Cerner, McKesson,
eCW, and NextGen**

1,000+
Terabytes of Healthcare
Data Actively Managed
and Stored

500 Million+
Medical Records
Preserved

Real-World Impact

Trusted by Leading Healthcare Providers:

Shepherd Center

What Users Are Saying

"Olah delivers exactly what they say they will, and they do so in a very straightforward way. We don't have to think about things too much because the process is as easy as possible."

– Manager, KLAS May 2024

"The return on investment we get with Olah is that we get to maintain multiple legacy systems for however many years are required. The archive probably saves us several hundreds of thousands of dollars in time, materials, service costs, and so on every year."

– Manager, KLAS May 2024
